### PROFILE

**A Software Developer who is passionate about Front-end development.**

Hands-on, highly competent, results-driven Software Engineer who can think "out-of-the-box". A person who is strong in problem solving skills and loves to code using best possible architectural / software design patterns. Expertise in Html5, CSS3, JavaScript and many other programming languages / frameworks (listed in Skills section).

### EDUCATION

2022 – present  
Wah Cantt      **Software Engineering**  
University of Wah

2021  
Wah Cantt, Pakistan      **FSC (pre-engineering)**  
The hope college

### SKILLS & TOOLS

HTML & CSS	<div><div></div></div>	Tailwind CSS	<div><div></div></div>
Bootstrap	<div><div></div></div>	JavaScript	<div><div></div></div>
React	<div><div></div></div>	Next.js	<div><div></div></div>
Figma	<div><div></div></div>	Python	<div><div></div></div>
jQuery	<div><div></div></div>	SQL	<div><div></div></div>
GitHub	<div><div></div></div>	C++	<div><div></div></div>
Java	<div><div></div></div>	Microsoft office	<div><div></div></div>

### LANGUAGES

English	<div><div></div></div>	Urdu	<div><div></div></div>
Hindi	<div><div></div></div>		

## PROJECTS

2023 – present

### **Web 3.0 Research**

University project

- This project allowed me to not only deepen my knowledge of emerging technologies but also to position myself at the forefront of the ever-evolving field of web development. It reflects my commitment to staying current with technological advancements and my readiness to contribute to the Web3 revolution.

2023

### **Quiz Game**

University Project

- The Interactive Quiz Game (Java Language) is a dynamic and engaging software application designed to challenge users with a wide range of quiz questions while providing a fun and educational experience. This project shows my expertise in Java programming, and also highlights my passion for creating engaging and educational interactive applications.

2022

### **Smart Electricity Billing System**

University Project

- The Smart Electricity Billing System (C++ Language) is a sophisticated software application designed to streamline and modernize the process of calculating and managing electricity bills. This project represents a significant advancement in utility billing systems, offering both consumers and service providers a more efficient and convenient way to handle electricity billing.

2021

### **Netflix Website Clone**

Responsive web design

- This project demonstrates my proficiency in web development, front-end design, and responsive web design. It offers a fully functional and visually appealing Netflix-like interface that adapts seamlessly to various devices and screen sizes.

## STRENGTHS

### **Technical Proficiency:**

Strong foundation in object-oriented programming, data structures, and algorithms.

### **IT Methodologies:**

Actively studying software development methodologies, including Agile, Scrum, and Waterfall, to develop a strong foundation for delivering high-quality software solutions.

### **Communication skills**

Enhanced communication skills, vital for articulating ideas and resolving issues, honed through public speaking and software development experience.

### **Strong Problem-Solving Skills:**

Proven ability to analyze complex issues, identify effective solutions, and implement them efficiently, resulting in successful outcomes in various contexts.

### **Critical Thinker:**

Developed critical thinking skills, complemented by proficiency in public speaking.

### **Discipline & Teamwork**

Demonstrated discipline, teamwork, and enhanced communication skills through debate and sports.
